

Recycling and green energy production - 1st Mobility

During our time in Poland, we not only participated in funny and engaging activities but also dived into some compelling topics, such as, recycling and the production of green energy.

Rzeszów water purification plant

Water dam in Klimkówka

The photovoltaic plant ML Systems

A horse carriage ride in Regietów

On a funny note, there was a contest held in Poland that required participants to create their own meme that represented Erasmus+. Unexpectedly, Portugal emerged as the winner!
