

5TH MOBILITY: WATER SCARCITY AND TOURISM POLLUTION

DAY 1

We arrived in Canarias Island and had fun with our friends in the afternoon, in a park.

In the evening, we watched a football match.

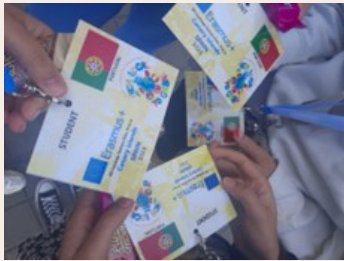

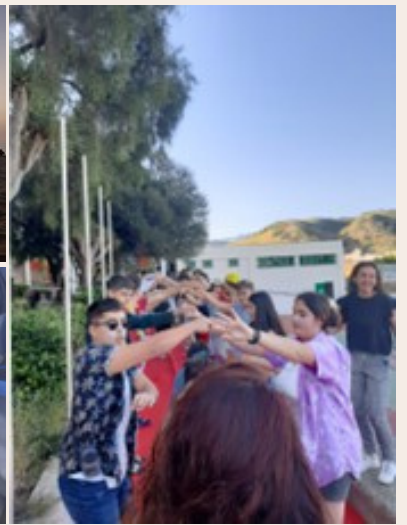

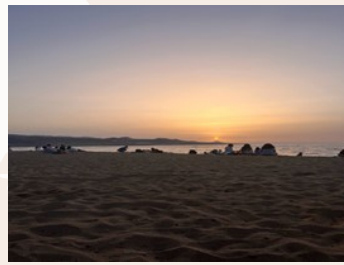

DAY 2

In the morning, we had an opening ceremony and we presented our works.

In the afternoon, we visited to historical center Arucas.

Late in the afternoon, we went to the beach.

DAY 3

Europeans consume a lot of water for different ends. But over the years, water is getting scarce because of climate change.

A solution to water scarcity is desalination. As such, we visited a desalination plant where we learned that is a process through in which salt is removed.

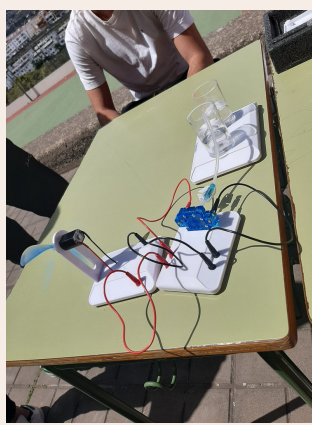

Currently, this process, applied to seawater, is one of the most used to obtain water for agriculture.

Then, we visited Cueva Pintada an archaeological park.

DAY 4

In the morning, we had activities at school: Interactive Photo o QR ; ECOGARDEN; SCAPE ROOM; Hydrogen experiments.

DAY 5

We Visited the Science and Technology Elder Museum.

DAY 6

In the evening, we enjoyed our farewell dinner and said goodbye to everyone!!
